USANA Founder Dr. Myron Wentz Receives Albert Einstein Award

SALT LAKE CITY--(BUSINESS WIRE)--June 27, 2007--Dr. Myron Wentz, founder, chairman, and CEO of [USANA Health Sciences, Inc.](http://www.usanahealthsciences.com) (NASDAQ: USNA), was honored Monday at a special ceremony in Jerusalem with the Albert Einstein Award for Outstanding Achievement in the Life Sciences.

The Albert Einstein Award, given by Global Capital Associates, salutes leaders whose vision and commitment have contributed to the critical advancement of vital life-saving and life-enhancing technology to benefit mankind. Dr. Wentz received the award in recognition of his many scientific and charitable endeavors.

"I am honored and humbled to receive an award that bears the name of Albert Einstein," Dr. Wentz said. "As both an extraordinary scientist and dedicated humanitarian, he serves as a great inspiration for my life's work, helping people lead healthier lives through nutritional science."

Dr. Wentz is an internationally recognized microbiologist, immunologist and pioneer in the development of human cell culture technology and infectious disease diagnoses. In 1974 he launched Gull Laboratories, which developed groundbreaking viral diagnostic assays, including the first commercially available test for diagnosing infection with the Epstein-Barr virus. Dr. Wentz sold his controlling interests in Gull Laboratories in 1992 and founded USANA Health Sciences, a state-of-the-art manufacturer of science-based nutritional supplements and personal-care products. Most recently, he founded Sanoviv Medical Institute, a holistic medical facility with full hospital accreditation located in Baja California. He holds a Ph.D. in microbiology and immunology from the University of Utah.

Today Dr. Wentz is increasingly focused on his humanitarian and charitable endeavors, recently founding the Wentz Medical Centre and Laboratory in Uganda and the Wentz Medical Centre in Cambodia to serve children in those countries orphaned by diseases such as malaria and HIV. Dr. Wentz was a recipient of the Children's Champion Award by Children's Hunger Fund, for which he travels worldwide as a medical missionary.

While Dr. Wentz' primary focus is on health and disease prevention, his love for music and appreciation for his undergraduate alma mater led him to contribute generously to the construction of the Wentz Concert Hall and Fine Arts Center at North Central College in Naperville, Ill.
