USANA Health Sciences Recognized as a Founding Reporter of The Climate Registry

Industry Leader Takes Action on Climate Change

SALT LAKE CITY--(BUSINESS WIRE)--Jan. 17, 2008--[USANA Health Sciences, Inc.](#) (NASDAQ: USNA) announced today that it has become a Founding Reporter of The Climate Registry. The Climate Registry is a non-profit organization established to measure and publicly report greenhouse gas emissions (GHG) in a common, accurate and transparent manner consistent across industry sectors and borders. Thirty-nine U.S. states, including Utah, five Canadian provinces, three Native American tribes, two Mexican states, and the District of Columbia are the founders of the organization.

A forerunner in the health and wellness industry, USANA has demonstrated environmental stewardship on several fronts by voluntarily committing to measure, independently verify and publicly report their GHG emissions on an annual basis. USANA has also committed to implement an Environmental Management System (EMS) that is a model for the industry. They promote energy efficiency in the design and operation of their facilities, manufacturing systems, and shipping operations. The corporate headquarters is xeriscaped and there have been and they are continuing to add many environmentally friendly updates to their buildings including solar panels. (See below for USANA Green policies.)

"USANA Health Sciences has demonstrated exemplary environmental leadership by courageously stepping forward to support The Climate Registry in its preliminary stages. We are deeply grateful for their integral support in helping to address the challenge of climate change," said The Climate Registry Chair Gina McCarthy.

USANA President Dave Wentz said the company chose to participate in The Climate Registry to further USANA's mission of helping people achieve optimal health. "At USANA, we believe that without taking the health of our environment into consideration we cannot hope to improve the health of those around us," Wentz said.

USANA Health Sciences recognizes that human health and environmental health go hand in hand. Thus, its mission to develop and manufacture the highest quality, science-based health products possible carries with it a responsibility to do so in ways that protect, preserve and promote the integrity of the environment. USANA's commitment to environmental stewardship reflects its comprehensive approach and passion to overall health for everyone.

About USANA

USANA Health Sciences develops and manufactures high-quality nutritionals, personal care, and weight management products that are sold directly to Preferred Customers and Associates throughout the United States, Canada, Australia, New Zealand, Hong Kong, Japan, Taiwan, South Korea, Singapore, Malaysia, Mexico, the Netherlands and the United Kingdom.

About The Climate Registry

Incorporated March 2007 in Washington, DC, The Climate Registry provides accurate and transparent measurement of GHG emissions and ensures consistency of measurement metrics across industry sectors and borders. The Climate Registry accounting infrastructure supports both voluntary and regulatory programs. For more information please visit, www.theclimateregistry.org.

Entities that join before May 2008 are eligible to receive Founding Reporter status.

USANA Green Policies

- * Implement an Environmental Management System (EMS) that is a model for our industry.
- * Ensure that our EMS meets or exceeds all relevant environmental regulations.
 - * Train our employees as to their roles and responsibilities in carrying out our environmental policies, and provide incentives for them to do so.
 - * Promote energy efficiency in the design and operation of our facilities, manufacturing systems, and shipping operations.
 - * Use innovative technologies to improve the efficiency with which we use and recycle raw materials and natural resources.
 - * Develop and upgrade our products with the goal of minimizing their environmental impacts throughout their product lifecycles.
 - * Continuously refine and improve our EMS to align it with advances in environmental science, environmental engineering, and our evolving business needs.
 - * Communicate our environmental policies to employees, suppliers, customers, and community members, urging them to join us in our efforts to protect, preserve, and promote the environment.
